

Dear valued customers and partners,

We are happy to inform you - Vink Chemicals enlarges its product portfolio and solutions for your demands in biocides.

We recently acquired the product range of technical biocides as well as Oil and Gas additives from Schülke&Mayr:

- parmetol;
- grotamar;
- grotanol;
- grotan;
- stabicor;
- stabicide;
- easycult (dipslides);
- & further types brands for technical application and Fuel, oil & gas.

In addition to the well-established Vinkocide brands, Vink Chemicals, proudly adds former brands from Schülke to the product portfolio.

Technical Biocide and Fuel, Oil and gas specialists (Product Development, Regulatory, Sales) of Schülke are joining Vink as well and will play an important role in the company's future growth.

At the production sites in Kakenstorf and Memmingen, Vink will continue to produce under the same high-quality standards and identical specifications as Schülke before.

In the next upcoming days and weeks we will share more customized details with you and your team.

Kind regards
Chief Marketing Office Technical Biocid
David Zilm Vink Chemicals GmbH & Co. KG
